Vascular Insights Names Three Top Physicians to Advisory Board

Madison, Conn., Sept 29, 2008 — Vascular Insights LLC announced today that it has named three experts on vein disease to its Scientific Advisory Board. They are Jean Jerome Guex, M.D., of Nice, France; Nick Morrison, M.D., of Scottsdale, AZ; and Neil S. Sadick, M.D., of New York, NY.

“We are delighted to welcome these distinguished physicians to our Board,” said John P. Marano Jr., co-founder, president, and managing partner of Vascular Insights. “Their insights will be invaluable as we prepare for human introduction later this year.”

Vascular Insights LLC (<http://vascularinsights.com>) of Madison, Conn., engages in the design, development, manufacture, and marketing of medical devices for the minimally invasive treatment of peripheral vascular disease.

In May 2008 the company announced that it had received 510(k) clearance from the U.S. Food and Drug Administration (FDA) to market its ClariVein™ infusion catheter for infusion of physician-specified agents in the peripheral vasculature.

ClariVein™ is a percutaneous, 2 ²/₃ Fr (0.035”) catheter, containing a rotating wire, driven by a motor, that enhances fluid dispersion in the treatment area.

The company was co-founded by John P. Marano, Jr. and Dr. Michael Tal, based on Dr. Tal’s insights into interventional procedures. Dr. Tal is chief medical advisor to the company and associate professor of radiology at Yale University School of Medicine.
